

## ECOS Platform

The ECOS Platform offers the **business best-practice** to the Community Service Program network.

The platform supports a range of programs **under one roof**.

**Weatherization, Energy Assistance** and **CSBG** are managed with a specific ECOS program module.

ECOS provides a **collaborative platform** by interconnecting all the delivery agencies in one **secure web-based network**.

The platform is **highly interoperable** providing for **efficient data exchange** and **plug-in capability** through our flexible API.
